

## ■ New Product

# GE2-3 DENSO® Industrial Spark Plug

Now available!

From January 2019, MOTORTECH will be adding the new GE2-3 industrial spark plug from DENSO® to its range. The new spark plug was specially developed for use in state-of-the-art engine applications and, with its unique iridium alloy on the center and ground electrode, is ideally suited for operation with natural and special gases. Its new, innovative design with a protruding ground electrode with copper core increases the electrical and mechanical strength and service life of the spark plug.

### General Features

- Longer insulator design offers best flashover protection
- The ground electrode with copper core increases the electrical and mechanical load capacity
- J-type electrode design for enhanced combustion
- Advanced spark erosion resistance
