

Product Update

SparkView High Voltage Indicator

Extended Measuring Range up to 50 kV

With the well-known indicator SparkView from MOTORTECH, the high voltage demand of spark plugs can be easily and conveniently measured and visualized while the engine is running.

With regular measurements, the condition of the ignition system and especially of the spark plugs can be easily determined and the changeover time can be optimally specified.

In order to be prepared for future requirements, MOTORTECH is now offering its latest version of the SparkView with an extended measuring range of up to 50 kV. This version thus replaces the current device with its measuring range up to 40 kV.

SparkView

MOTORTECH HIGH VOLTAGE INDICATOR

Features

- Extended measuring range up to 50 kV
- Further increased accuracy
- Unchanged pricing

Ordering Information

P/N	Description
06.90.099-150	SparkView high voltage indicator, incl. SparkScan1 high voltage clamp P/N 06.90.100, for use with spark plug leads
06.90.099-155	SparkView high voltage indicator, incl. BNC cable P/N 06.90.105, for use with flange ignition coils or externally mounted ignition coils with diagnostic interface

Further information on the SparkView high voltage indicator is available for download at <https://www.motortech.de/infocenter/download-center/sales-flyer.html>.
