

Product Update

DetCon2 – New Hardware

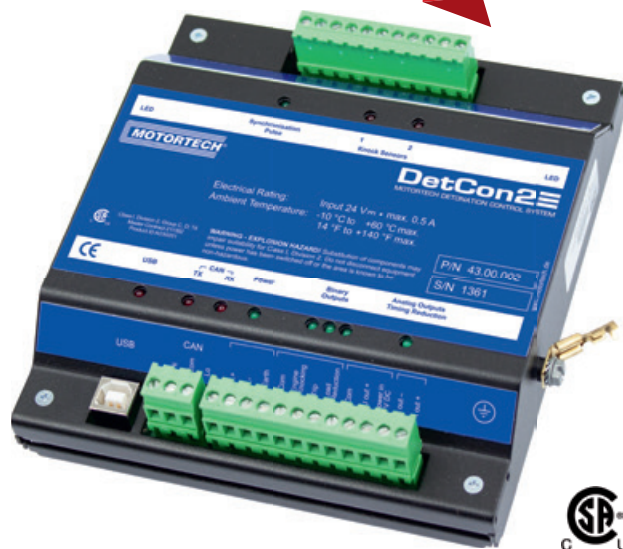

Revision 1.2

With the beginning of the delivery from serial number S/N: 20260065 on, a new hardware revision of the MOTORTECH DetCon2 Detonation Control System is accomplished. This will improve the EMC-interference resistance even more in the future.

Like the previous hardware version 1.1-TO, the new hardware is CSA certified and can therefore still be purchased as built-in unit for control cabinets or in a CSA certified housing.

In addition, MOTORTECH is extending the serial number code from 4 to 8 digits to adapt the serial numbers to the changed internal revision system.

The product functionality and product features are not affected by the change. Also the dimensions of the product remain the same.

Reasons of Change

- Internal revision system was changed
- Improvement of EMC interference immunity
