

Spark Plug Reconditioning

Professional Service for Industrial Spark Plugs

In general there is no need to replace used spark plugs with new ones. Many of these spark plugs may be reusable for many more hours after a professional reconditioning.

Based on years of technical experience MOTORTECH offers a competitive reconditioning process for almost all popular industrial precious metal spark plugs. The comprehensive reconditioning process covers around 20 steps for a perfect result, including intensive inspection, analyzing, cleaning, leakage test, performance test, etc.

Reduce your operation cost and save our environment!
