

## Thermocouple For MAN® Gas Engines

Turbocharged MAN® gas engines already leave the factory with one thermocouple for exhaust gas temperature monitoring on each cylinder bank. For spare parts supply MOTORTECH offers an alternative to the engine manufacturer's part.

### Features

- Precisely fitting spare part for problem-free replacement of the original part
- Including required thermowell for installation
- Same connector arrangement for integration in existing wiring
- For use on following MAN® gas engines::
  - ▶ E0834 LE320, E0836 LE202
  - ▶ E2876 TE302, E2876 LE202/302
  - ▶ E2848 LE322
  - ▶ E2842 LE302/312/322/202
  - ▶ E2676 LE202/212
  - ▶ E3268 LE212/222
  - ▶ E3262 LE202/212/222

### Ordering Information

P/N	Description	Equivalent to
51.27421-0158-MOT	Thermocouple, NiCrNi, type K	MAN® 51.27421-0158

### Ordering Information – Optional Equipment

P/N	Description	Equivalent to
06.30.112	Connecting cable for thermocouple, length 5.4 m	MAN® 51.25411-6028
